

Upgrade your company files

AccountEdge Pro

AccountEdge Network Edition

AccountEdge Pro for Windows

Upgrade your files (existing users only)

Company files created with a previous version of your AccountEdge or Premier Accounting software need to be upgraded. You also need to upgrade all customized reports, forms, letters, and spreadsheets that you used with your previous version of the software.

It is best to optimize and verify your company file first, then if there are no errors found you can make a back up copy of your company file before you upgrade it. Once you upgrade your company file, you can open it only in AccountEdge AccountEdge Network Edition , depending which software you use. However, the backup file can still be opened in your previous software version.

Upgrade AccountEdge company files
